

## DATA CONTEXT

ANALYSIS: Arthur Dorvil (01/29/2026)

This dashboard analyzes Medicare spending per patient episode (MSPB) across four hospitals in the Bradenton-Sarasota region for calendar year 2023.

The analysis focuses on hospital-level variation in Medicare spending, benchmarked against the national average score of 1.00.

Scores above 1.00 indicate higher-than-average Medicare spending per patient episode, while scores below 1.00 indicate lower-than-average spending.

This project also demonstrates data modeling and data quality remediation, including resolving inconsistent facility identifiers and missing values across CMS datasets.

Data Period: January 1, 2023 – December 31, 2023
